TEXTILES

the fabric of success

Fisher Textiles is the leading supplier of fabric for digital printing. We have been at the forefront of providing fabric solutions to the digital printing industry since 1988 and have committed ourselves to the future success of textile printing. It is our mission to keep our value proposition high while maintaining excellent quality and service to our entire customer portfolio. We stand behind our products and take pride in providing the best fabrics in the digital printing industry.

Our customer service and technical support is unmatched. Highly skilled and trained employees provide a quick response and personal attention to every inquiry.

Our capital investment of inventory and three warehouse locations allow us to fill just in time requirements. Most orders ship within twenty-four hours.

The quality of our fabric is ensured through our proprietary inspection system, the **Premium Product Process**[®] to offer the highest degree of quality and reliability with each order.

Our in house product development system is customer driven and delivers innovative products at the best possible price. We can create new constructions for woven, knit and nonwoven fabric.

Our fabrics are designed and prepared for digital printing, heat set at extremely high temperatures to ensure the lowest possible shrinkage levels.

Many of our fabrics are Flame Retardant and meet NFPA 701. We issue a certificate of flame retardancy with every order. Other test methods we certify include California Title 19, German B-1 and ASTM E84.
