## Experience the ProEdge Difference

ProEdge Precision performs high-quality precision machining services using a wide array of state-of-the-art CNC machines which support a variety of turn-key operations. As one of only a limited number of certified aerospace machine shops, ProEdge has a quality management system that is certified to the latest revisions of Aerospace Standard AS9100 and the International Quality System Standard ISO 9001.

While our experience goes back over 30 years, we are not just another CNC machine shop. Our equipment and methods are cutting edge. We constantly upgrade to the latest equipment, taking full advantage of industry innovations and developing proprietary advances of our own to give our customers a clear advantage.

You won't find a higher quality advanced manufacturing operation anywhere, guaranteed.

## Mission, Vision & Values Quality Policy

### Our Mission

To provide creative and innovative manufacturing solutions across multiple industries including aerospace, medical and energy

### Our Vision

To set the standard for excellence in manufacturing products and services and to provide a great place of employment that inspires people to be extraordinary

### Our Values

The compass for our actions:

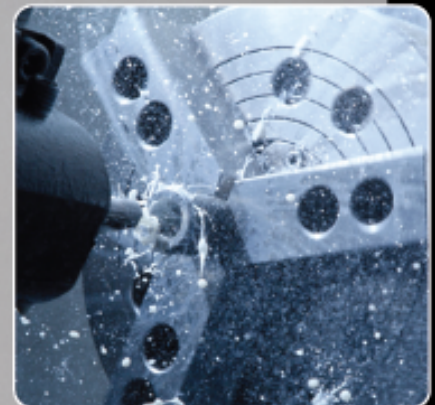

**Leadership:** Provide strength and courage to navigate through change and mold a better future

**Accountability:** Incorporate and respect the actions of the entire team in achieving company goals

**Quality:** Achieve excellence through evaluation and continuous improvement

**Integrity:** Commit to and maintain high moral principles and professional standards

**Innovation:** Provide value-added solutions for our customers

## Precision-Machined Parts Created With No Excuses

ProEdge features 38,000 square feet of manufacturing space with 35 CNC machining centers, all focused on producing the highest quality precision-machined parts money can buy. Our sophisticated machining centers include CNC Turning Centers, CNC Milling Centers, CNC Swiss-type Screw Machines and CNC Electro Discharge Machining (EDM).

With these state-of-the-art facilities available, we are able to take on automotive, medical and aerospace machining contracts, confident that we will be able to meet the understandably high standards these industries require from their precision-machined parts. Just reflecting for a moment on the lives that depend on flawless automotive, medical and aerospace machining keeps our focus clearly on quality.

### Our State-of-the-Art Facilities Offer:

- 38,000 Square Feet of Climate Controlled Space
- Full Lab Facilities - In-House Quality Control Program
- Quick Turnarounds with Competitive Lead Times
- Up-to-Date Compliance with ALL Current EPA/OSHA Regulations
- State-of-the-Art Management and Engineering Technology
- Experience with Varying Delivery Programs of Customers
- Trucking Available
