

OVERVIEW

AMCASE® is your best choice for modular casework solutions. Whether it's healthcare, lab, educational, or retail applications, we have over 10,000 modular component choices to design and build the perfect sustainable workplace environment for your needs.

AMCASE® products are built in our state-of-the-art facility with CNC technology based production and on-site CAD drawing systems. This enables us to provide a streamlined process to the customer from initial design to final delivery on extremely fast and efficient production schedules. Give us a call today, and let us know how we can be of service.

MANUFACTURING CAPABILITIES

Our casework is made here in the USA

- 120,000 sq. ft. of manufacturing and corporate office space.
- CNC (Computer Numeric Control) manufacturing equipment and CAD designs enable production of casework at the highest level of accuracy and in the least amount of time.
- AMCASE® uses a “parallel lines” manufacturing method which means multiple jobs can be produced at the same time.

AMCASE® advantage

FINANCIAL

- 7-year depreciation schedule, providing substantial savings over 39-year plans.
- GSA Schedule & State Contracts
- 7-year warranty
- Moveable, Reconfigurable, Reusable – break down assembled units for easy moving, reuse in other applications, or storage. This means less to repurchase.
- Easily Repairable Components – the ability to disassemble components and assemblies allow for easy repairs.

MODULAR CONSTRUCTION

- Modular Design – provides the greatest flexibility of use and maintenance.
- Consist Design – provides a uniform look across all product applications establishing a consist feel throughout your facility.
- Heavy-duty hardware – cam and pin metal fasteners which are superior in strength to glue and dowel construction allow for disassembly.

EXPERIENCE & CUSTOMER CARE

- 30 years of industry experience
- Medical, government, educational, retail, and custom installations
- Repeat customers
- Data storage of all jobs processed allows for long-term asset management between our clients and AMCASE®

GREEN COMMITMENT

AMCcase® strives to manufacture casework products that are environmentally friendly and superior in construction. We focus on three distinct areas in reducing our carbon footprint: product materials, manufacturing processes, and packaging/transportation.

While the benefits stop here with most products, AMCcase® modular casework continues to provide years of green benefits to the end user through replaceable parts and modular capabilities. At the end of its useful life (estimated at 20 plus years), the casework can be recycled.

Below is a list of LEED Credits to consider. Our AMCcase® representatives will gladly work with you on these categories. We have a network of dealers nationwide so contact us to find a dealer in your area.

LEED CREDITS SUPPORTED

Contributes to achieving Credits for:

Materials and Resources

- MR 4.1* Products contain at least 10% recycled content.
- MR 4.2* Products contain at least 20% recycled content.
- MR 5.1* Use of 10% materials (by cost) are regionally manufactured
- MR 5.2* Use of 20% materials (by cost) are regionally manufactured
- MR 6* Rapidly Renewable Materials (available for an upcharge)
- MR 7* Certified Wood (available for an upcharge)

Indoor Environmental Quality

- IEQ 4.4* Low emitting materials in commercial interior (upcharge)

PRODUCT MATERIALS

- Board Core – CPA ECC 4-11 certification. Certified to CARB ATCM 93120 Phase 2 emission limits. Contains a minimum of 90% recycled wood fiber. Urea formaldehyde free board is available for an upcharge.
- Edgeband – GREENGUARD Certified
- Metal Components – allows for easy disassemble of casework for reuse, repair, or recycling. Steel to steel fastening system allows for 100% of casework to have replaceable parts.

MANUFACTURING

- CNC – Computer Numeric Control manufacturing increases efficiency and accuracy with less energy and waste.
- Waste – Remaining production by-products are captured and used to produce electrical power. Additionally, waste scraps are turned over to a waste management company for recycling.
- Plant Energy Consumption – CNC manufacturing requires less energy, lighting levels, and water consumption.

PACKAGING & TRANSPORTATION

- Packaging – Maximize use of reusable packaging products and use recyclable and recycled paper packaging.
- Transportation – Bundle shipments geographically and maximize trailer loads.

DESIGNING FOR A FACILITY ■

AMCASE® was contacted to provide a complete solution for an entire clinic, including reception areas, exam rooms, storage and records area, and a break room. Each area was designed for maximum efficiency with attention to producing a beautiful contemporary workspace. The end result: consist design throughout – another AMCASE® advantage.

Future additions, modifications, and reconfigurations will be easy for our customers thanks to our long-term customer data storage. This stores key information on every cabinet, in every room, making it easier than ever to order additional shelves, cabinets, or whatever your needs might be in the future.

We would be happy to help you with your modular casework needs. Let us know how we can be of service.

LABS OVERVIEW ■

AMCcase® offers complete modular casework lab solutions for both commercial and higher education facilities. As you can see, each solution is unique because each client's needs vary from one project to another. Our exceptional design team, coupled with our extremely versatile casework system is the key ingredients to designing a highly functional and sustainable lab area for our clients.

We have a variety of work surfaces to choose from including HPL, Trespa®, phenolic, epoxy, and more depending on your application requirements. Our design team is ready to assist you with your current and future lab needs.

EDUCATIONAL FACILITIES OVERVIEW

AMCASE® covers the gamut of educational casework applications. From college labs and cafeteria areas, to microscope tables, study lounges and reception areas, we have something for every niche.

Whether you prefer warm woodgrain colors or need vibrant playful colors, we can take care of it. If you have any questions regarding AMCASE® modular casework, please give us a call. We welcome the opportunity to work together with you on your current or future projects.

RECEPTION/NURSE STATIONS

Reception and nurse station areas are a blend of worker/patient interactions and data entry tasks. These areas are essential to a facility's administration team. Worker occupancy levels, patient care volumes, and traffic flow patterns, all play a part in the design process and help determine each area's unique design requirements. So whether you are designing a space for one healthcare worker or a hundred, AMCASE® can make enough casework for everyone. Just let us know when to get started.

CUSTOMS OVERVIEW ■

In a sense, all casework jobs are customized to each client's individual needs, but sometimes you need something extra special.

AMCcase® offers very unique solutions for individual design needs. Special slopes and angles, customized drawers, compartments and accessories are our specialty. Do you need decorative panels? We can do it. What about mobile mailslot stations? We can do that too. Let's face it, when a design is not run-of-the-mill, you need experienced hands involved. That's why we build in-house which allows us to directly oversee the project from start to finish. What can we build for you?
