

Magna

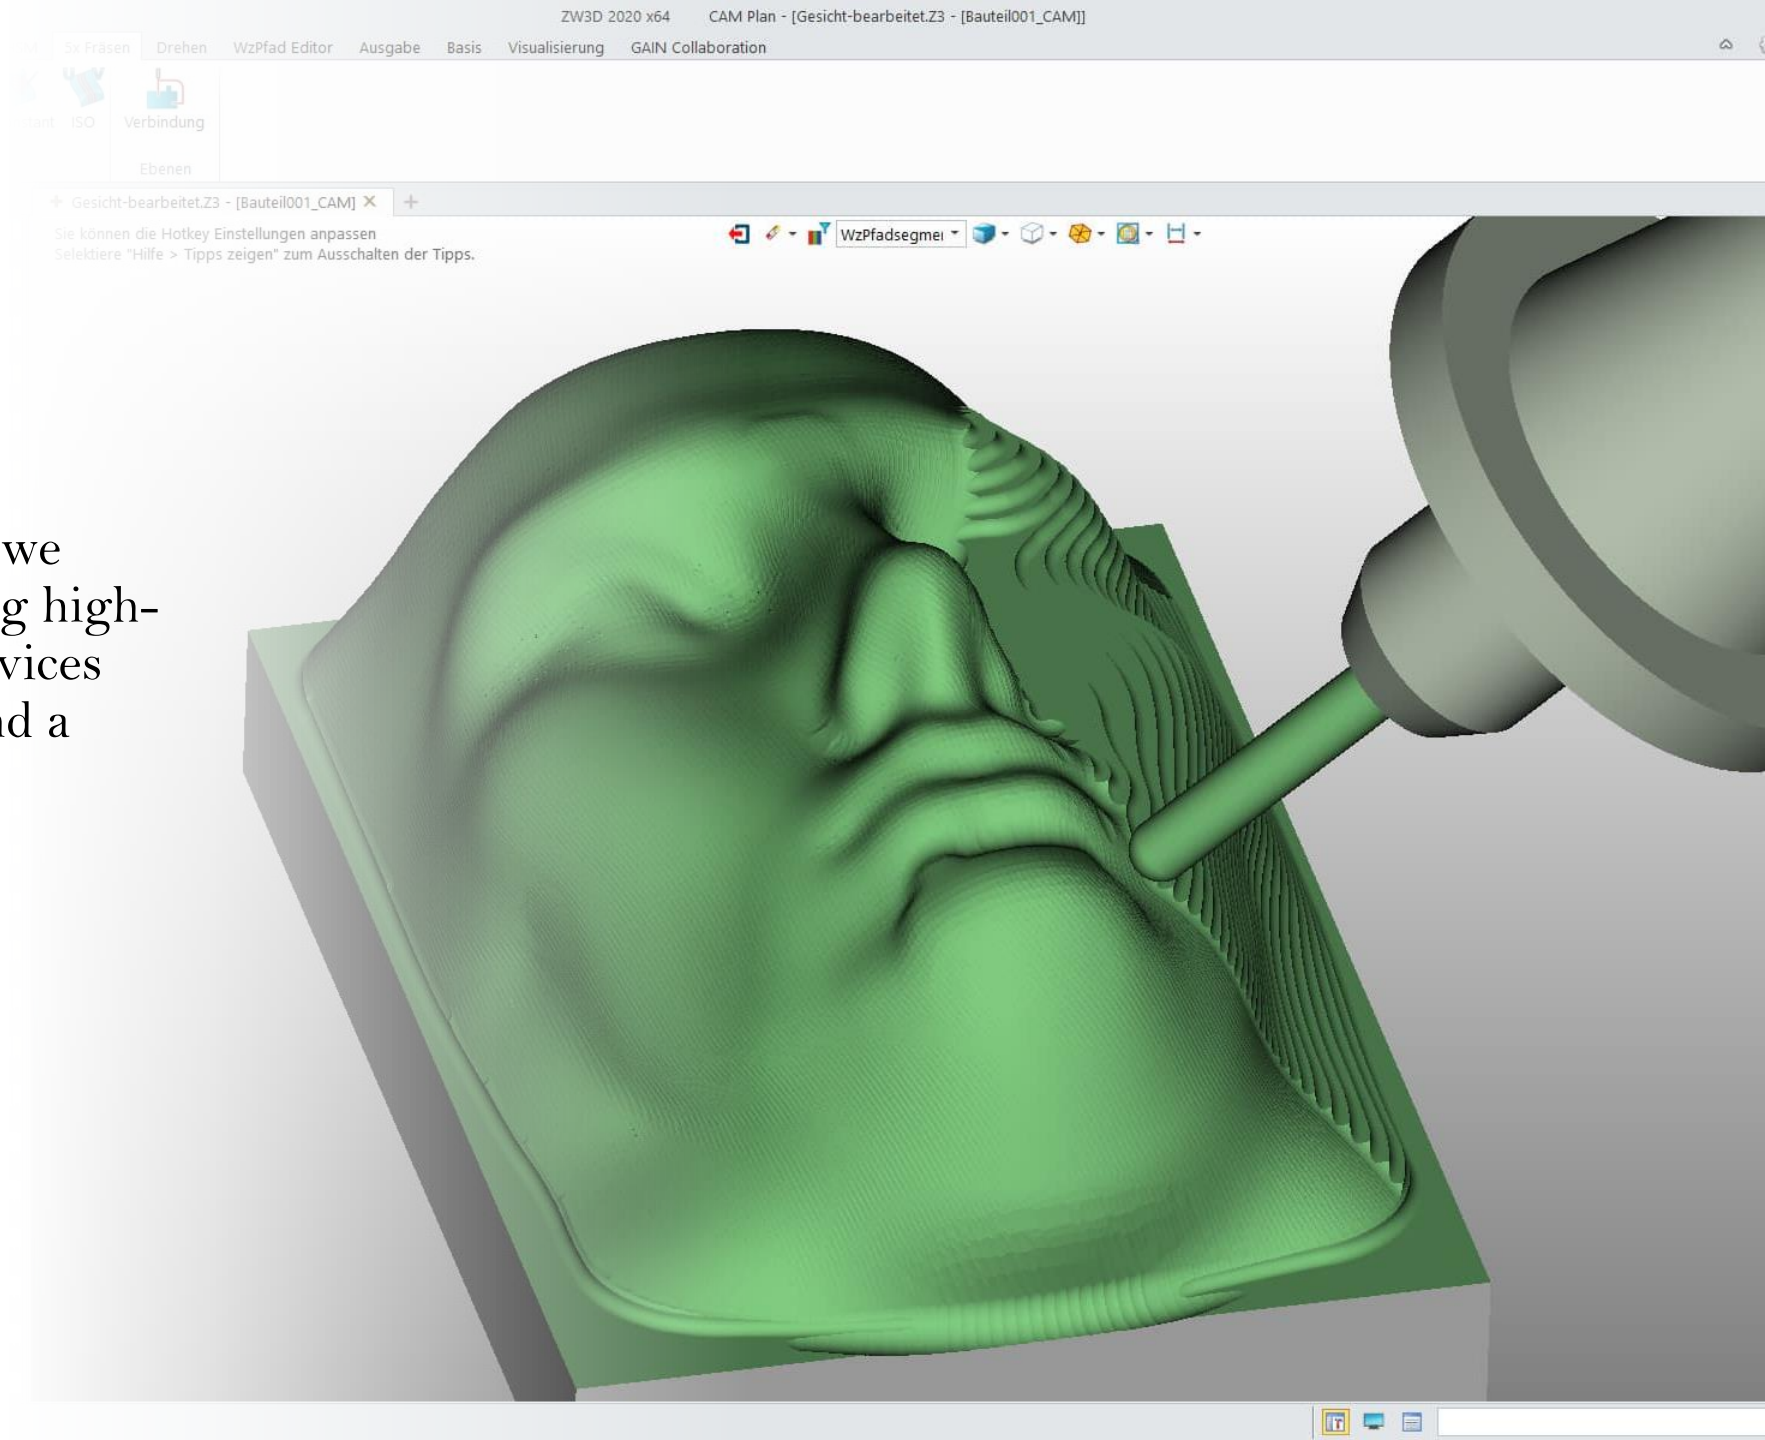

Machining, Inc.

Precision Machining Services

Who we are

At Magna Machining, Inc., we pride ourselves on delivering high-quality CNC machining services with precision, efficiency, and a commitment to excellence.

Cutting Edge Equipment

- Multi-Axis CNC Machines: *Capable of handling complex geometries with ease.*
- High-Precision Lathes & Mills: *Ensuring tight tolerances and superior finishes.*
- Advanced CAD/CAM Software: *Seamless integration from design to production.*
- Quality Control: *State-of-the-art CMMs for precise measurements and inspections.*

Expert Team

- Skilled machinists with years of experience in CNC programming and manufacturing.
- Dedicated project managers to keep your job on track, from start to finish.
- Continuous training programs to stay ahead of industry standards.

A digital depth gauge is shown measuring a cylindrical metal part. The gauge's digital display shows the number 20.01. In the background, a computer monitor displays a spreadsheet with various data points, including the number 20.01 in a highlighted cell. The scene is set against a plain white background.

Commitment to Excellence

Our Commitment to Excellence

- On-Time Delivery: We know how crucial deadlines are, and we hit them, every time.
- Lean Manufacturing: Focused on efficiency to bring you competitive pricing.
- ISO-Compliant Processes: Quality is at the heart of everything we do.

Collaborative Approach

Collaborative Partnership

We work closely with our clients, ensuring clear communication and partnership throughout the project.

Our Facility's Capabilities

We combine advanced technology with a skilled team to deliver top-tier CNC machining solutions. Here's a look at what our facility brings to the table:

CNC Milling:

- (15) Vertical Machining Centers
- Bed Capacity: Y=24.00" x 50.00"
- 4 Axis with Helical Interpolation and Thread Milling
- CNC Prototype Milling
- 5-Axis CNC Milling with CAD-CAM

CNC Turning:

- (3) CNC Lathes
- Bar Capacity: 1/16" to 3" maximum with bar feed
- Chucking Capacity to 14" maximum
- Live Tooling Capability

Partner Services

At Magna Machining, we believe in delivering the highest quality products to our customers. To achieve this, we have established trusted partnerships with several industry-leading vendors who provide specialized services. These partnerships ensure that every component we produce meets the stringent standards of our clients. Below are some of the valued services our partners provide:

- Anodizing
- Black Oxide
- Zinc Plating
- Nitrocarburizing

Why Magna Machining?

We're not just a CNC shop; we're a partner committed to making your projects successful.

Let's chat about how we can add value to your operations.
