COMPANY OVERVIEW

MS XTEC LLC is a precision manufacturing company based in Charlotte, North Carolina, established in 2023. As a subsidiary of MS XTEC GmbH, headquartered in Germany, the Charlotte facility specializes in producing high-quality components for various industries, including automotive, commercial vehicles, agriculture, and racing.

Key Products and Services: Precision Components: Manufacture of valve trains, rocker arms, valve bodies, and transmission housing.

Materials Expertise: Utilization of aluminum, steel, castings, and forgings.

Advanced Capabilities: Prototyping and scalable series production (50 to 350,000 units), with tolerances as tight as 0.005 mm.

Automation and Digitalization: Integration of robotic loading, real-time monitoring, and intelligent process networking for enhanced efficiency and traceability.

MS XTEC LLC operates from a 21,527sft facility in Charlotte, focusing on production, logistics, sales, and planning and a 243,264sft facility in Schura Germany.

The company emphasizes flexibility in batch sizes and is committed to delivering tailored manufacturing solutions that meet the specific needs of its clients.

CORE COMPETENCIES

- Precision CNC machining and custom manufacturing
 - Advanced materials processing and component design
 - Mechanical systems engineering and prototyping
 - Supply chain integration and just-in-time delivery solutions
 - Industrial automation and process optimization
-

DIFFERENTIATORS

- German engineering excellence paired with local U.S. operations

- State-of-the-art equipment and automated production lines
 - Agile and scalable production capacity
 - Strong commitment to quality, compliance, and sustainability
 - Bilingual team (English/German) for seamless international collaboration
-

PAST PERFORMANCE / EXPERIENCE

While MS XTEC LLC is newly established in the U.S., our parent company in Germany has over 60 years of industry experience, supplying to global OEMs and Tier 1 suppliers. Select highlights include:

- Long-term partnerships with top automotive manufacturers
 - Custom parts development for energy sector clients in Europe
 - Joint R&D collaborations with German technical institutes
-
