

# Frequently Asked Questions

**1. What types of fabrics can you accept?**

We accept woven, nonwoven, as well as knit fabrics. We also have the ability to print on paper and plastic. Please call for a comprehensive list.

**2. What widths can you print?**

We print on fabrics 45" to 90" on our Rotary Screen Printing and Finishing units. We have the ability to print 15" to 64" on our flexographic printing machine.

**3. What are your repeat sizes?**

25.25", 32", 36" rotary screen-printing  
15" to 64" flexographic printing

**4. How many screens/colors can you print?**

Our rotary screen printing machines can print up to 12 colors. Our flexographic printing machine has the capability to print up to 4 colors

**5. What are your minimum order amounts?**

Our minimum order amount for rotary screen-printing, finishing, and coating is 10,000 linear yards per order. We accept smaller order quantities on a case-by-case basis. We offer machine samples and table samples for a flat fee or by an hourly rate. Our flexographic printing order minimums are 30,000 linear yards per order.

**6. How quickly can my order be produced?**

Every customer and order varies. We require at least 2 weeks to produce the order. Because of the nature of the industry our turn around times vary. We will always work to have your order completed as quickly as possible.

Please call to discuss specific periods and order requirements.

**7. What type of ink do you use?**

We use water-based pigment inks and dispersed dyes

**8. Are your chemicals and inks environmentally safe?**

Yes.

**9. What size rolls can RCC handle incoming and outgoing?**

We can accept or ship rolls up to 50" in diameter and 1,000 lbs or less

**10. Can RCC accept container loads?**

Yes.

**11. Does RCC make sleeves, plates, and screens?**

No, we use third party vendors.

**12. Does RCC guarantee quality?**

Yes. We have strict quality control guidelines.

**13. Do you have a testing facility?**

Yes, we have an on-site lab.

**14. Are you a certified lab?**

No, however we can provide certified results if required.

**15. What types of testing do you do?**

**Fire Resistance:** MVSS 302,  
NFPA 701 small scale, ASTM  
D6413

**Other:** Crocking, wash, shrink,  
Hydrophobic, Hydrophilic, add-on  
weights, and Abrasion

\*Please call if you have other needs for testing that we do not have listed here.
