Equipment Shops  
Distribution Centers  
Production Plants  
Manufacturing warehouses  
Clean Rooms  
R & D Facilities  
Loading Dock Areas  
Laboratories  
Training Rooms  
Administrative / Offices

## WHO WE ARE

### Because your success is our success, we work with you to find the right architecture services and solutions for your project.

As a certified Small Business Enterprise (SBE) architecture and design firm focused on industrial and manufacturing work, we stay specialized in order to provide the highest level of tailored, personalized service. As opposed to telling our clients what we can build for them, our approach asks what is it that you need? We look beyond a one-size-fits-all approach and pride ourselves in developing the right solutions for our clients that offer improved outcomes, not just services.

Passionate about creating dynamic industrial spaces, SCOPE has recognized expertise in production testing, manufacturing, laboratories, research and development facilities, equipment shops, vehicle maintenance, clean rooms, warehouses, to name a few. Our goal is to provide you with a customized, quality and cost-effective design that considers long-term planning, flexibility and workplace safety. Our experience means less time is spent reviewing fundamentals and more time is spent on the technically sophisticated aspects of your project. We engage in an open, active dialogue about the collaborative possibilities to reduce operational costs, increase flexibility and embody the best environmental design practices.

Getting the most productivity per square foot while creating safe, dynamic spaces takes finesse. When you work with us you benefit from a client-centered / one-on-one service with our team. SCOPE remains unmatched in its ability to work collaboratively, engaging communities and building consensus to create facilities that deliver best-in-class operations.

Put our more than 40 years of combined individual experience to work for your company. No doubt you'll see why the majority of our clients continue to call SCOPE their architecture firm of choice after more than ten years of service.

*"We have worked on numerous projects at the Bausch+Lomb Greenville Solution Plant with SCOPE to create highly technical, state-of-art facilities with minimal issues. SCOPE's insightful ideas help us meet the challenges of expanding and/or upgrading the existing plant while avoiding interruption to the plant's 24/7 operations. Their team is excellent and always available to address comments and concerns. They consistently show that they will meet project deadlines and budgets every single time. SCOPE plays an important role in the success of the projects that we do together."*

— DALE GOLDMAN, PROJECT MANAGER  
M. B. KAHN CONSTRUCTION COMPANY, INC.
